

IN THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) A method of storing content on a removable medium, the method comprising the steps of:

... providing a user interface for selecting a first content item stored on a storage means;

5 ~~storing content on the removable medium;~~

... retrieving a further content item related to the first content item from a system on a network using an ~~identification identifier~~ of the first content item ~~a title, wherein the said identifier is being an~~ indicator selected from the group consisting of a fingerprint of the content item, an identifier embedded in the content item, an identifier embedded in an electronic program guide

10 entry of the content item, and ~~an~~ address of the system, ~~said further content item comprising a part of a master copy of the first content item, said part not being present in the first~~
15 ~~content item;~~ and

... storing ~~the further~~ content on the removable medium ~~comprises storing the further content item on the removable medium.~~

2. (Currently Amended) ~~A~~ ~~The~~ method as claimed in claim 1, wherein ~~the method further comprises~~ the step of:

~~storing the first content item~~ on the removable medium ~~further comprises storing the content item on the removable medium.~~

3. (Currently Amended) ~~A- The~~ method as claimed in claim 1,
wherein the method further ~~comprising~~ comprises the step of:
_____ providing a user interface for paying for the further
content item.

4. (Currently Amended) ~~A- The~~ method as claimed in claim 1,
wherein said method further ~~comprising~~ comprises the step of:
_____ determining whether a user is a subscriber.

5. (Currently Amended) ~~A- The~~ method as claimed in claim 1,
wherein the step of retrieving a further content item comprises
retrieving at least one of: a removed scene, an added scene, a
biography, a documentary, an image, an advertisement, a menu, a
5 menu comprising an advertisement, and a trailer.

6. (Currently Amended) ~~A- The~~ method as claimed in claim 1,
wherein the step of storing the further content on the removable
medium further comprises storing a menu on the removable medium.

7. (Cancelled).

8. (Currently Amended) An electronic device for storing
content on a removable medium, the electronic device comprising:
_____ a storage means having content stored thereon;
_____ a writer able to store for storing content on the removable
5 medium;

~~..... a network interface; and~~
- ~~a control unit able to use~~having an input device ~~and an~~
~~output device to enable a user to select a first content item~~
stored on a storage means,
10 wherein
~~..... the electronic device further comprises a network~~
~~interface;~~
~~..... wherein the control unit is able~~being operative to use the
network interface to retrieve a further content item related to the
15 first content item from a system on a network using an identifier
of the content item;
~~..... wherein the identifier is~~being an indicator selected from
the group consisting of a fingerprint of the content item, an
identifier embedded in the content item, an identifier embedded in
20 an electronic program guide entry of the content item, and address
of the system, ~~said further content item comprising a part of a~~
~~master copy of the first content item, said part not being present~~
~~in the first content item, and~~
~~..... wherein the control unit is able to use~~controlling the
25 writer to store the further content item on the removable medium.

9. (Cancelled).

10. (Currently Amended) A computer storage medium embodying
program instructions that when executed, cause a programmable

apparatus to function as an electronic device for storing content on a removable medium, comprising functions for:

5 | - providing a user interface for selecting a first content item stored on a storage means;

| - retrieving a further content item related to the first content item from a system on a network using an identifier of the content item, wherein the identifier is an indicator selected from
10 | the group consisting of a fingerprint of the content item, an identifier embedded in the content item, an identifier embedded in an electronic program guide entry of the content item, and address

| of the system, said further content item comprising a part of a master copy of the first content item, said part not being present
15 | in the first content item; and

| storing the further content item on the removable medium.
